

## R S Skips Ltd

We have been providing waste management services to R S Skips, a well-respected waste management company in the North-West Kent region since 2012. R S Skips, a family business with a 100% commitment to recycling, make it a priority to look after their customers to help them achieve sustainability in their businesses.

Following a recommendation, and then based on price and recycling/recovery figures, R S Skips started tipping waste at McGrath's Barking Materials Recycling Facility (MRF) in 2012. Able to manage most wastes themselves, mostly from the construction and demolition industry, it was the residues that they needed to manage sustainably. McGrath has developed one of the UK's most sophisticated facilities for producing refuse derived fuel (RDF), a fully sustainable process which produces fuel using residual wastes. The residues are baled at the MRF in Barking and then shipped to partners on the continent

using the company's wharf facilities. At these plants the RDF bales are incinerated to produce electricity for the local grid. Ash residues are recycled while remaining material is used in road and cement production. Using Greenhouse Gas conversion data available from Defra it is calculated that the process saves over 500kg of CO2e for each tonne of RDF processed.

R S Skips and their customers share this desire to reduce their impact on the environment. Combining effective collaboration with McGrath and their customers, R S Skips have accelerated sustainability across their supply chain and are now able to claim 99.9% recycling/recovery rates.

McGrath's waste reports provide the documentation that R S Skips require for their customers to back this up, available electronically once the waste has been processed at McGrath's MRF.

**Client:**  
R S Skips Ltd

**Contract:**  
Waste Management

**Duration:**  
Ongoing

**Start Date:**  
2012

We appreciate McGrath's service-focused approach to business as well as their zero-to-landfill commitment. We could tell straight away that creating a successful working relationship with us was McGrath's priority and we have never been let down by them. Their service is second to none.

Sukh Randhawa, Operations Manager, R S Skips
