

## Axis Europe

Axis Europe is a leading property services partner that work on projects across the social housing, public, commercial and heritage sectors, from preserving and conserving, to refurbishing and renewing. Axis Europe work with some of the UK's largest building owners, landlords and facilities managers to provide strategic repairs, planned maintenance and improvements.

As Axis Europe's preferred waste provider, McGrath Bros. (Waste Control) Ltd. provides cross-sector services.

With a working relationship dating back over 13 years, we work with site managers on a daily basis, providing frequent and clear communication and ensuring a smooth delivery of service across a variety of projects. We are currently servicing 25 projects across London for clients such as Metropolitan Police Service, various heritage sites and Government and Local Authority buildings. We remove an average of 377 tonnes of municipal waste material a year, all of which is diverted from landfill and either recycled or processed for energy recovery.

Most recently, the majority of the waste tipped for Axis Europe has originated from works including fire door replacements at a social housing project in Westminster. In addition, recent internal refurbishments on behalf of the Metropolitan Police Force at Belvedere Station has also contributed to the uptick in removal. Both projects have

utilised our on-demand skip-hire service which is often provided at very short notice.

The waste typically consists of construction and demolition material, timber and non-hazardous scrap, this is segregated off site at the MRF, passing through an initial pre-sort stage to remove oversized objects before placed onto the feeding belt to be separated by size and segregated by mineral and non-mineral items. This process employs both manual and visual inspections as well as state of the art technology, and the end results can vary from recycled materials to fuel for energy.

Axis Europe consider several environmental factors when choosing a waste provider, placing great emphasis on sustainability and reporting. McGrath Bros. (Waste Control) Ltd's diversion to landfill, industry-leading recycling rates as well as community investment are all cited as benefits to the working partnership, and the online portal adds further value to this service.

The portal allows our clients like Axis Europe to track what waste is produced in order to implement processes to help reduce this in future. Furthermore, bespoke monthly and annual waste reports are easy to produce and relay to end clients, isolating certain sites and projects to communicate the exact amount of waste produced and recycled on each project.

**Client:**  
Axis Europe

**Contract:**  
MRF Facilities and Recycling Services, Skip and RORO

**Duration:**  
Ongoing

**Start Date:**  
Pre 2008
